

Dataset: Reading Property Data December 2022

Data source: Zoopla (webscraping)

Brief description:

The original dataset contained information on 950 properties which were within a 10-mile radius of the Reading (Berkshire, UK) area. Data was obtained through webscraping on Zoopla. The data included listing price, listing info, room info, and location.

Area of interest: 2-bed and 3-bed properties in this area

Key findings (properties under £1m):

- Of the 887 properties on the market which were under £1m, 29% were 3-bed properties, 28% were 2-bed, 22% were 4-bed, and 14% were 1-bed.
- The median list price of a flat is: £258,475, whilst the median list price of a house is: £515,000.
- 2-bed flat vs. 2-bed house:
 - The median list price of a 2-bed flat is £290,000 (lower quartile = £250,000; upper quartile = £327,000).
 - The median list price of a 2-bed house is £350,000 (lower quartile = £300,000; upper quartile = £412,000).
 - This represents an increase of 20.69%.
- 3-bed flat vs. 3-bed house:
 - The median list price of a 3-bed flat is £325,000 (lower quartile = £290,000; upper quartile = £335,000).
 - The median list price of a 3-bed house is £460,000 (lower quartile = £400,000; upper quartile = £550,000).
 - This represents an increase of 41.54%.

Preliminary steps

Import necessary Python packages

```
In [ ]: import numpy as np
import pandas as pd
import seaborn as sns
import matplotlib.pyplot as plt
```

Import dataset (read in csv file) and view the first 10 rows

```
In [ ]: df = pd.read_csv("/Users/andreakoko/Documents/Reading_housing_data_Dec_2022/Reading_housing_data_Dec_2022.csv")
df.head(10)
```

	Unnamed: 0	Listing price	Listing info	All rooms	Location
0	0	£850,000	4 bed detached house for sale	Bedrooms4Bathrooms3Living rooms3	Bluebell Crescent, Woodley, Reading RG5

View dataset info

In []: `df.info()`

```
<class 'pandas.core.frame.DataFrame'>
RangeIndex: 950 entries, 0 to 949
Data columns (total 5 columns):
#   Column          Non-Null Count  Dtype
---  -
0   Unnamed: 0      950 non-null   int64
1   Listing price   950 non-null   object
2   Listing info    950 non-null   object
3   All rooms       950 non-null   object
4   Location        950 non-null   object
dtypes: int64(1), object(4)
memory usage: 37.2+ KB
```

Data Preparation

Steps:

1. Remove Unnamed column
2. Rename columns for cleaner code
3. Remove £ symbol from listing price and convert column data type to int64
4. Split 'Listing info' to extract property type information (split between 'bed' and 'for')
5. Split 'All rooms' and create separate columns for 'bedrooms', 'bathrooms', 'living rooms'
6. Create a new column and group all property types under two categories: either 'house' or 'flat'

Drop unnamed column (duplicate of index)

```
In [ ]: df = df.drop("Unnamed: 0", axis=1)
df.head(10)
```

Out []:

	Listing price	Listing info	All rooms	Location
0	£850,000	4 bed detached house for sale	Bedrooms4Bathrooms3Living rooms3	Bluebell Crescent, Woodley, Reading RG5
1	£290,000	2 bed flat for sale	Bedrooms2Bathrooms1Living rooms1	Kennet Walk, Reading RG1
2	£325,000	2 bed flat for sale	Bedrooms2Bathrooms1Living rooms1	46 Bath Road, Reading RG1
3	£200,000	1 bed flat for sale	Bedrooms1Bathrooms1Living rooms1	Russell Street, Reading RG1
4	£499,000	3 bed semi-detached house for sale	Bedrooms3Bathrooms2Living rooms1	Woolhampton Way, Reading RG2
5	£525,000	3 bed semi-detached house for sale	Bedrooms3Bathrooms1Living rooms2	Southcote Farm Lane, Reading RG30
6	£700,000	6 bed semi-detached house for sale	Bedrooms6Bathrooms3Living rooms1	Beech Lane, Reading RG6
7	£625,000	4 bed detached bungalow for sale	Bedrooms4Bathrooms1Living rooms2	Nash Grove Lane, Finchampstead, Wokingham RG40
8	£625,000	4 bed detached house for sale	Bedrooms4Bathrooms2Living rooms2	Anvil Close, Spencers Wood, Reading, Berkshire...
9	£750,000	5 bed detached house for sale	Bedrooms5Bathrooms4Living rooms3	Cressingham Road, Reading, Berkshire RG2

In []: `# df["All rooms"].value_counts()`

Rename and standardise column names

In []: `df1 = df.rename({"Listing price": "list_price", "Listing info": "list_info", "All rooms": "rooms", "Location": "location"})`
`df1.head()`

Out []:

	list_price	list_info	rooms	location
0	£850,000	4 bed detached house for sale	Bedrooms4Bathrooms3Living rooms3	Bluebell Crescent, Woodley, Reading RG5
1	£290,000	2 bed flat for sale	Bedrooms2Bathrooms1Living rooms1	Kennet Walk, Reading RG1
2	£325,000	2 bed flat for sale	Bedrooms2Bathrooms1Living rooms1	46 Bath Road, Reading RG1
3	£200,000	1 bed flat for sale	Bedrooms1Bathrooms1Living rooms1	Russell Street, Reading RG1
4	£499,000	3 bed semi-detached house for sale	Bedrooms3Bathrooms2Living rooms1	Woolhampton Way, Reading RG2

Remove '£' symbol and ',' from 'list_price'

```
In [ ]: df1.list_price = df1.list_price.str.strip("£").str.replace(",","")
df1.head()
```

```
Out [ ]:
```

	list_price	list_info	rooms	location
0	850000	4 bed detached house for sale	Bedrooms4Bathrooms3Living rooms3	Bluebell Crescent, Woodley, Reading RG5
1	290000	2 bed flat for sale	Bedrooms2Bathrooms1Living rooms1	Kennet Walk, Reading RG1
2	325000	2 bed flat for sale	Bedrooms2Bathrooms1Living rooms1	46 Bath Road, Reading RG1
3	200000	1 bed flat for sale	Bedrooms1Bathrooms1Living rooms1	Russell Street, Reading RG1
4	499000	3 bed semi-detached house for sale	Bedrooms3Bathrooms2Living rooms1	Woolhampton Way, Reading RG2

Check the data type of each column/variable

```
In [ ]: df1.dtypes
```

```
Out [ ]: list_price    object
list_info     object
rooms         object
location      object
dtype: object
```

'List_price' column contains string elements, hence showing as 'object' datatype. Column contains instances of "POA" (price on asking).

Return a new dataframe without rows with "POA".

```
In [ ]: df1 = df1[df1.list_price != "POA"]
```

Convert the data type of 'list_price' column. Change from 'object' to 'integer'.

```
In [ ]: df1.list_price = df1.list_price.astype("int64")
```

```
In [ ]: df1.dtypes
```

```
Out [ ]: list_price    int64
list_info     object
rooms         object
location      object
dtype: object
```

Split 'list_info' values to extract property type

In []: *# View a sample*

```
df1.list_info.sample(10)
```

```
Out [ ]: 528      3 bed semi-detached house for sale

Although there are missing values under 'bathrooms' and 'living rooms', these two variables will not be used in our analysis so we can leave them as they are for now.

There is still a missing value under 'bedrooms' in row 353. We will remove this instance from the dataset.

Visualise price vs. number of bedrooms

```
In [ ]: sns.boxplot(data=df_under1m, x="bedrooms", y="list_price")  
plt.show()
```

There appears to be a clear difference in list price based on the number of bedrooms. A steady upward trend can be observed for properties with 0 - 5 bedrooms, with little overlap with one another, showing a fairly uniform increase in list price as the number of bedrooms go up. From 4-bed properties onwards, there appears to be little correlation between number of bedrooms and list price, but this may be due to the low sample size for these property types and the fact that properties over £1m had been excluded. This can be confirmed by further correlation analysis if of interest.

Create a subset of the dataset which only contains properties with 1 - 5 bedrooms

```
In [ ]: onetofivebeds = df_under1m[(df_under1m.bedrooms >= 1) & (df_under1m.bedrooms <= 5)]
onetofivebeds.sample(20)
```

```

As we are most interested in two-bed and three-bed properties, let's compare the list price of these properties.

Create a subset of the dataset which only contains two-bed and three-bed properties.

```
In [ ]: two_three_beds = df_under1m[(df_under1m.bedrooms == 2) | (df_under1m.bedr  
two_three_beds.sample(10)
```

Out[]:	list_price	list_info	rooms	location	bedrooms	bathrooms	living_roon

Visualise the respective list price of the four types of properties: 2-bed houses, 2-bed flats, 3-bed houses, 3-bed flats.

```
In [ ]: sns.boxplot(data=two_three_beds, x="bedrooms", y="list_price", hue="property_type",  
plt.show())
```

There is some overlap in list price between 2-bed flats and 2-bed houses. The difference in list price between 3-bed flats and 3-bed houses is more significant, with no overlap. Note the much smaller amount of 3-bed flats on the market.

End of analysis
